Art Unit: 1761

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-12, 34-35, drawn to the product, classified in class 426, subclass 615.

II. Claims 13-33, 36-51, drawn to the process, classified in class 426, subclass 508.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by another and materially different process such as cooking in an extruder. The product does not need to be made by the particular processing steps of the method.

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Randall Shoemaker on Feb. 12, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
